

## Product Datasheet

### Goat anti-Mouse IgG (H&L), Affinity purified, Unconjugated, min. cross-reactivity to bovine, goat, human, rabbit or rat IgG, highly adsorbed against Rat IgG GRP12483

<b>Species/Host</b>	Goat
<b>Form/Appearance</b>	Liquid
<b>Storage</b>	Store at 2-8°C.
<b>Note</b>	For research use only.
<b>Clonality</b>	Polyclonal
<b>Purity</b>	Affinity purified IgG
<b>Dilution Range</b>	The optimal working dilution should be determined by the investigator.
<b>Application Notes</b>	<p>Additional Information: This antibody reacts with the heavy chains on mouse IgG and with the light chains on all mouse immunoglobulins based on immunoelectrophoresis. Highly cross absorbed against rat IgG. Minimum cross-reactivity is observed to non- immunoglobulin mouse serum proteins based on immunoelectrophoresis. Minimum cross-reactivity was observed with IgG from bovine, goat, human, Rabbit or rat based on immunoelectrophoresis. Antibody is supplied in 10 mM sodium phosphate, 150 mM sodium chloride, pH 7, 0.05 % (w/v) sodium azide as preservative.</p> <p>Background: Goat anti-mouse IgG (H&amp;L), affinity purified is a secondary antibody which binds to mouse IgGs in immunological assays. Antibodies are adsorbed against bovine, goat, human, rabbit or rat IgG and highly adsorbed against rat IgG and affinity purified using solid phase mouse IgG.</p>
