

Product Datasheet

Donkey anti-Sheep IgG (H&L), Affinity purified, Unconjugated, min. cross-reactivity to human, rabbit IgG

GRP12488

Species/Host	Donkey
Form/Appearance	Liquid
Storage	Store at 2-8°C.
Note	For research use only.
Clonality	Polyclonal
Purity	Affinity purified IgG
Dilution Range	The optimal working dilution should be determined by the investigator.
Application Notes	<p>Additional Information: This antibody reacts with the heavy chains on sheep IgG and with the light chains on all sheep immunoglobulins based on immunoelectrophoresis. Minimum cross-reactivity is observed to non-immunoglobulin sheep serum proteins based on immunoelectrophoresis. Antibody is supplied in 10 mM sodium phosphate, 150 mM sodium chloride, pH 7, 0.05 % (w/v) sodium azide as preservative. BSA and milk have to be replaced by other blocking reagents, like donkey serum or commercial formulations which are free from bovine IgG. Background: Donkey anti-sheep IgG (H&L), affinity purified, is an unconjugated secondary antibody which binds to sheep IgGs in immunological assays. Antibodies are adsorbed against human, rabbit IgG and affinity purified using solid phase sheep IgG.</p>
