

Product Datasheet

Goat anti-Rabbit IgG (H&L), HRP conjugated, min. cross-reactivity to human serum - trial sample GRP12530

Species/Host	Goat
Immunogen	Purified rabbit IgG (H&L)
Form/Appearance	Liquid
Storage	Store liquid material at 2-8°C up to 6 month.
Note	For research use only.
Clonality	Polyclonal
Purity	Affinity purified IgG
Dilution Range	This conjugate is suitable for all immunoassay applications. The optimal working dilution should be determined by the investigator.
Application Notes	<p>Additional Information: Purity of this preparation is > 95% based on SDS-PAGE. Antibody concentration is 1.0 mg/ml. Antibody is supplied in 10 mM sodium phosphate, 0.15 M sodium chloride, pH 7.2.1 % (w/v) B, Protease/IgG free. Contains 0.1 % (v/v) Kathon CG as preservative of bacterial growth. Based on immunoelectrophoresis, this antibody reacts with: heavy chains on rabbit IgG, light chains on all rabbit immunoglobulins. Based on immunoelectrophoresis, no reactivity is observed to: non-immunoglobulin rabbit serum proteins, human serum proteins. Background: Goat anti-rabbit IgG (H&L) is a secondary antibody conjugated to HRP, which binds to rabbit IgG (H&L) in immunological assays. Antibody is affinity purified using solid phase rabbit IgG (H&L).</p>
