

Product Datasheet

Goat anti-Rabbit IgG (H&L), Biotin conjugated, min. cross-reactivity to human, mouse, rat serum GRP12534

| | |
|--------------------------|---|
| Species/Host | Goat |
| Immunogen | Purified rabbit IgG (H&L) |
| Form/Appearance | Liquid |
| Storage | Store at 2-8°C. Shelf life is 1 year from date of receipt. Prepare working dilution prior to use and then discard. |
| Note | For research use only. |
| Clonality | Polyclonal |
| Purity | Affinity purified IgG |
| Dilution Range | This conjugate is suitable for all immunoassay applications. The optimal working dilution should be determined by the investigator. |
| Application Notes | <p>Additional Information: Purity of this preparation is > 95% based on SDS-PAGE. Antibody concentration is 1.0 mg/ml (E 1% at 280 nm = 13.0). Antibody is supplied in 10 mM sodium phosphate, 0.15 M sodium chloride, pH 7.2.1 % (w/v) B, Protease/IgG free. Contains 0.05% (w/v) sodium azide as preservative of bacterial growth. Based on immunoelectrophoresis, this antibody reacts with: heavy chains on rabbit IgG, light chains on all rabbit immunoglobulins. Based on immunoelectrophoresis, no reactivity is observed to: non-immunoglobulin rabbit serum proteins, serum proteins from human, mouse or rat. Background: Goat anti-rabbit IgG (H&L) is a secondary antibody conjugated to biotin, which binds to rabbit IgG (H&L) in immunological assays. Antibody is affinity purified using solid phase rabbit IgG (H&L).</p> |
