Product Datasheet

Rabbit anti-Chicken IgY (H&L), Affinity purified, Unconjugated GRP12540

Species/Host Rabbit

Immunogen Purified Chicken IgG/Y (H&L)

Form/Appearance Liquid

Storage Store at 2-8°C.

Note For research use only.

Clonality Polyclonal

Purity Affinity purified rabbit IgG

Dilution Range This antibody is suitable for all immunoassay applications. The

optimal working dilution should be determined by the

investigator.

Application Notes Additional Information: Purity of this preparation is > 95% based on SDS-PAGE.

Antibody concentration is > 4.5 mg/ml (E 1% at 280 nm = 13.0). Antibody is supplied in 10 mM sodium phosphate, 0.15 M sodium chloride, pH 7.2. Contains

0.05% (w/v) sodium azide as preservative of bacterial growth. Based on

immunoelectrophoresis, this antibody reacts with: heavy chains on chicken IgG

(IgY), light chains on all chicken immunoglobulins Based on

immunoelectrophoresis, no reactivity is observed to: non-immunoglobulin chicken serum proteins Background: Rabbit anti-chicken IgG/Y (H&L) is a

secondary antibody which binds to chicken IgG/Y (H&L) in immunological assays.

Antibody is affinity purified using solid phase chicken IgG/Y.
