Product Datasheet

Rabbit anti-Rat IgG (H&L), ALP conjugated **GRP12567**

Species/Host Rabbit

Purified rat IgG (H&L) **Immunogen**

Form/Appearance Liquid

Storage Non-diluted antibody is stable for 4 years at 2-8°C. For storage at

-20°C dilute antibody solution with an equal volume of glycerol to obtain final glycerol concentration of 50 % to prevent loss of enzymatic activity. Such solution will not freeze in -20°C. If you are using a 1:5000 dilution prior to diluting with glycerol, then you would need to use a 1:2500 dilution after adding glycerol. Prepare working dilution prior to use and then discard. Be sure to

mix well but without foaming.

Note For research use only.

Clonality Polyclonal

Purity Affinity purified rabbit IgG

Dilution Range This conjugate is suitable for all immunoassay applications. The

optimal working dilution should be determined by the

investigator. Suggested starting dilution(s): 1:500-1:2000 (IHC),

1:50 000-1:5 000 (WB)

Application Notes

Additional Information: Purity of this preparation is > 95% based on SDS-PAGE. Antibody concentration is 1.50 mg/ml (E 1% at 280 nm = 13.0). Antibody is supplied in 30 mM triethanolamine, pH 7.2.5 mM magnesium chloride, 0.1 mM zinc chloride, 1 % (w/v) B, Protease/lgG free. Contains 0.05% (w/v) sodium azide as preservative of bacterial growth. Based on immunoelectrophoresis, this

antibody reacts with: heavy chains on rat IgG, light chains on all rat

immunoglobulins. Based on immunoelectrophoresis, no reactivity is observed to: non-immunoglobulin rat serum proteins. Background: Rabbit anti-rat IgG (H&L) is a secondary antibody conjugated to ALP, which binds to rat IgG (H&L) in

immunological assays. Antibody is affinity purified using solid phase rat IgG

(H&L).
