Product Datasheet

Rabbit anti-Rat IgG (H&L), Affinity purified, Unconjugated, min. cross-reactivity to human serum GRP12572

Species/Host Rabbit

Immunogen Purified rat IgG (H&L)

Form/Appearance Liquid

Storage Store at 2-8°C.

Note For research use only.

Clonality Polyclonal

Purity Affinity purified rabbit IgG

Dilution Range This antibody is suitable for all immunoassay applications. The

optimal working dilution should be determined by the

investigator.

Application Notes Additional Information: Purity of this preparation is > 95% based on SDS-PAGE.

Antibody concentration is > 4.5 mg/ml (E 1% at 280 nm = 13.0). Antibody is supplied in 10 mM sodium phosphate, 0.15 M sodium chloride, pH 7.2. Contains

0.05% (w/v) sodium azide as preservative of bacterial growth. Based on

immunoelectrophoresis, this antibody reacts with: heavy chains on rat IgG, light

chains on all rat immunoglobulins. Based on immunoelectrophoresis, no

reactivity is observed to: non-immunoglobulin rat serum proteins, human serum proteins Background: Rabbit anti-rat IgG (H&L) is a secondary antibody which binds to rat IgG (H&L) in immunological assays. Antibody is affinity purified using

solid phase rat IgG (H&L).
