Product Datasheet

Goat anti-Human IgG (H&L), ALP conjugated GRP12642

Species/Host Goat

Reactivity Human

Predicted Reactivity Human IgG (H&L)

Tested Applications ELISA, ICC, WB, IHC

Immunogen Purified human IgG

Form/Appearance Liquid

Storage Non-diluted antibody is stable for 4 years at 2-8°C. For storage at

-20°C dilute antibody solution with an equal volume of glycerol to obtain final glycerol concentration of 50 % to prevent loss of enzymatic activity. Such solution will not freeze in -20°C. If you are using a 1:5000 dilution prior to diluting with glycerol, then you would need to use a 1:2500 dilution after adding glycerol. Prepare working dilution prior to use and then discard. Be sure to

mix well but without foaming.

Note For research use only.

Clonality Polyclonal

Purity Affinity purified goat IgG

Dilution Range 1 : 500-1 :2000 (ELISA) , 1 : 50-1 : 5000 (ICC), 1 : 20 -1 : 2000

(IHC), 1:500-1:2000 (WB)

Application Notes Additional Information: This antibody reacts with alpha (heavy chains) on human

IgG and all light chains on human immunoglobulins based on

immunoelectrophoresis.No reactivity is observed to non-immunoglobulin human serum proteins based in immunoelectrophoresis. ALP conjugate is supplied in 30 mM Triethanolamine, pH 7.2, 5 mM Magnesium Chloride, 0.1 mM Zinc Chloride, 1 % (w/v) BSA, Protease/IgG free. 0.05 % (w/v) of sodium azide is added as preservative Background: Goat anti-human IgG (H&L) is a secondary antibody conjugated to AP (Alkaline phosphatase) which binds to human IgG (H&L) in

immunological assays.
