

Product Datasheet

Goat anti-Human IgG Fc, Affinity purified, Unconjugated GRP12659

Species/Host	Goat
Form/Appearance	Liquid
Storage	Store at 2-8°C. Shelf life is one year from date of receipt.
Note	For research use only.
Clonality	Polyclonal
Purity	Affinity purified IgG
Dilution Range	The optimal working dilution should be determined by the investigator. Antibody is suitable for all immunoassay applications.
Application Notes	<p>Additional Information: Antibody is supplied in 10 mM Sodium Phosphate, 0.15 M Sodium Chloride, pH 7.2, 0.05 % (w/v) of sodium azide as preservative. Antibody reacts with the heavy chains on human IgG based on immunoelectrophoresis. No reactivity is observed to light chains on human immunoglobulins and non-immunoglobulin human serum proteins or to human IgG F(ab)'2 fragment based on immunoelectrophoresis. Background: Goat anti-human IgG Fc (two heavy chains with constant domains) is a secondary antibody which binds to human IgG Fc (two heavy chains with constant domains) in immunological assays.</p>
