

Product Datasheet

Goat anti-Human IgG Fc, Affinity purified, Unconjugated, min. cross-reactivity to bovine/mouse/rabbit serum GRP12664

| | |
|----------------------|--|
| Species/Host | Goat |
| Reactivity | Human |
| Predicted Reactivity | Human IgG Fc (two Heavy chains with constant domains) |
| Tested Applications | ELISA |
| Immunogen | Purified human IgG |
| Form/Appearance | Liquid |
| Storage | Store at 2-8°C. Shelf life is one year from date of receipt. |
| Note | For research use only. |
| Clonality | Polyclonal |
| Purity | Affinity purified goat IgG |
| Dilution Range | The optimal working dilution should be determined by the investigator. |
| Application Notes | <p>Additional Information: This antibody reacts with the heavy chains on human IgG based on immunoelectrophoresis. No reactivity is observed with the light chains on human immunoglobulins or non-immunoglobulin human serum or bovine, mouse or rabbit serum proteins based on immunoelectrophoresis. This antibody has been absorbed against solid phase normal bovine, mouse and rabbit serum in addition to mouse and rabbit IgG. Antibody is supplied in 10 mM Sodium Phosphate, 0.15 M Sodium Chloride, pH 7.2, 0.05 % (w/v) of Sodium azide as preservative. Background: Goat anti-human IgG Fc (two heavy chains with constant domains) is a secondary antibody which binds to human IgG Fc (two heavy chains with constant domains) in immunological assays.</p> |
