Product Datasheet

Goat anti-Rabbit IgG Fc, Biotin conjugated GRP12703

Species/Host Goat

Reactivity Rabbit

Predicted Reactivity Rabbit IgG Fc (two Heavy chains with constant domains)

Immunogen Purified Rabbit IgG

Form/Appearance Liquid

Storage Store non-diluted antibody at 2-8°C. Shelf life is 1 year from date

of receipt.

Note For research use only.

Clonality Polyclonal

Purity Affinity purified goat IgG

Dilution Range The optimal working dilution should be determined by the

investigator.

Application Notes Additional Information: This antibody reacts with the heavy chains on rabbit IgG

based on immunoelectrophoresis. No reactivity is observed to immunoglobulin

light chains or non-immunoglobulin rabbit serum proteins based on immunoelectrophoresis. Biotin conjugate is supplied in 10 mM Sodium Phosphate, 0.15 M Sodium Chloride, pH 7.2, 1 % (w/v) BSA, Protease/IgG free.

Phosphate, 0.15 M Sodium Chloride, pH 7.2, 1 % (w/v) BSA, Protease/IgG free. Contains 0.05 % (w/v) sodium azide as preservative Background: Goat anti-rabbit IgG Fc (two heavy chains with constant domains) is a secondary antibody conjugated to biotin which binds to rabbit IgG Fc (two heavy chains

with constant domains) in immunological assays.
