

Product Datasheet

Goat Ig fraction GRP12713

Species/Host	Goat
Form/Appearance	Liquid, 0.2 µm filtered
Storage	Store at 2-8°C.
Note	For research use only.
Purity	Ig fraction
Application Notes	Additional Information: Goat immunoglobulin fraction is provided in 10 mM sodium phosphate, 0.15 M sodium chloride, pH 7.2. 0.005 % sodium azide is added as preservative. Concentration is 4.5 mg/ml. Background: Goat IgG fraction contains total goat Ig from normal serum, e.g. serum of non immunized animals and is excellent for use as blocking reagent in immunoassays.
