

Product Datasheet

Rabbit Ig fraction GRP12721

Species/Host	Rabbit
Form/Appearance	Liquid, 0.2 µm filtered
Storage	Store at 2-8°C.
Note	For research use only.
Purity	Ig fraction
Application Notes	<p>Additional Information: Rabbit immunoglobulin fraction is provided in 10 mM sodium phosphate, 0.15 M sodium chloride, pH 7.2. 0.005 % sodium azide is added as preservative. Concentration is 4.5 mg/ml. Rabbit serum can be used as a blocking reagent at 2-5% for primary antibodies developed in a rabbit.</p> <p>Background: Rabbit IgG fraction contains total rabbit Ig from normal serum, e.g. serum of non immunized animals and is excellent for use as blocking reagent in immunoassays.</p>
