Product Datasheet

Rabbit Ig fraction GRP12721

Species/Host Rabbit

Form/Appearance Liquid, 0.2 μm filtered

Storage Store at 2-8°C.

Note For research use only.

Purity lg fraction

Application Notes Additional Information: Rabbit immunoglobulin fraction is provided in 10 mM

sodium phosphate, 0.15 M sodium chloride, pH 7.2. 0.005 % sodium azide is added as preservative. Concentration is 4.5 mg/ml. Rabbit serum can be used as a blocking reagent at 2-5% for primary antibodies developed in a rabbit.

Background: Rabbit IgG fraction contains total rabbit Ig from normal serum, e.g. serum of non immunized animals and is excellent for use as blocking reagent in

immunoassays.
