

Product Datasheet

Rabbit anti-Hamster IgG (H&L), Biotin conjugated GRP12752

Species/Host	Rabbit
Form/Appearance	Liquid
Storage	Store at 2-8°C. Shelf life of this product is one year from date of receipt.
Note	For research use only.
Clonality	Polyclonal
Purity	Affinity purified rabbit IgG
Dilution Range	The optimal working dilution should be determined by the investigator.
Application Notes	<p>Additional Information: This antibody reacts with the heavy chains on hamsterIgG and with the light chains on all hamster immunoglobulins based on immunoelectrophoresis. Minimum cross-reactivity is observed to non-immunoglobulin hamster serum proteins based on immunoelectrophoresis. Minimum cross-reactivity is observed to human serum based on immunoelectrophoresis. Antibody is supplied in 10 mM sodium phosphate, 150 mM sodium chloride, pH 7.2, 1 % (w/v) BSA, Protease/IgG free and 0.1 % (v/v) Kathon CG is used as preservative. Use of sodium azide will inhibit enzymatic activity of horseradish peroxidase. Background: Rabbit anti-hamster IgG (H&L) is a biotin conjugated secondary antibody, which binds to hamster IgG (H&L) in immunological assays.</p>
