

## **Product Datasheet**

## Goat anti-Mouse IgG (H&L), Biotin conjugated, min. cross-reactivity to bovine,goat,human, rabbit, rat IgG GRP12760

Species/Host	Goat
Form/Appearance	Liquid
Storage	Store at 2-8°C. Shelf life of this product is one year from date of receipt.
Note	For research use only.
Clonality	Polyclonal
Purity	Affinity purified IgG
Dilution Range	The optimal working dilution should be determined by the investigator.
Application Notes	Additional Information: This antibody reacts with the heavy chains on mouse IgG and with the light chains on all mouse immunoglobulins based on immunoelectrophoresis.Minimum cross-reactivity is observed to non-immunoglobulin mouse serum proteins. Minimum cross-reactivity was observed with IgG from bovine, goat, human, rabbit or rat based on immunoelectrophoresis.Antibody is supplied in 10 mM sodium phosphate, 150 mM sodium chloride, pH 7.2, 1 % (w/v) BSA, Protease/IgG free and 0.1 % (v/v) Kathon CG is used as preservative. Background: Goat anti-mouse IgG (H&L), is a secondary antibody biotin conjugated, which binds to all mouse IgGs in immunological assays. It is especially adsorbed against bovine,goat,human,rabbit,rat IgG and affinity purified using solid phase mouse IgG.
