

Product Datasheet

Rabbit anti-Goat IgG Fc, Affinity purified, Unconjugated GRP12764

Species/Host	Rabbit
Form/Appearance	Liquid
Storage	Store at 2-8°C.
Note	For research use only.
Clonality	Polyclonal
Purity	Affinity purified rabbit IgG
Dilution Range	The optimal working dilution should be determined by the investigator.
Application Notes	<p>Additional Information: This antibody reacts with the heavy chains on goat IgG based on immunoelectrophoresis. Minimum cross-reactivity is observed to the light chains or to non- immunoglobulin goat serum proteins based on immunoelectrophoresis. Antibody is supplied in 10 mM sodium phosphate, 150 mM sodium chloride, pH 7, 0.05 % (w/v) sodium azide as preservative. BSA and milk have to be replaced by other blocking reagents, like donkey serum or commercial formulations which are free from bovine IgG. Background: Rabbit anti-goat IgG Fc is a secondary antibody that binds to goat IgG Fc. Antibodies are affinity purified using solid phase goat IgG.</p>
