

Product Datasheet

Rabbit anti-Hamster IgG (H&L), ALP conjugated GRP12769

Species/Host	Rabbit
Immunogen	Purified hamster IgG (H&L)
Form/Appearance	Liquid
Storage	Non-diluted antibody is stable for 4 years at 2-8°C. For storage at -20°C, dilute with an equal volume of glycerol to prevent loss of enzymatic activity. Prepare working dilutions prior to use and then discard. Shelf life is 1 year from date of receipt. Prepare working dilution prior to use and then discard.
Note	For research use only.
Clonality	Polyclonal
Purity	Affinity purified rabbit IgG
Dilution Range	This conjugate is suitable for all immunoassay applications. The optimal working dilution should be determined by the investigator.
Application Notes	<p>Additional Information: Purity of this preparation is > 95% based on SDS-PAGE. Antibody concentration is 1.50 mg/ml (E 1% at 280 nm = 13.0). Antibody is supplied in 30 mM triethanolamine, pH 7.2.5 mM magnesium chloride, 0.1 mM zinc chloride, 1 % (w/v) B, Protease/IgG free. Contains 0.05% (w/v) sodium azide as preservative of bacterial growth. Based on immunoelectrophoresis, this antibody reacts with: heavy chains on hamster IgG, light chains on all hamster immunoglobulins. Based on immunoelectrophoresis, no reactivity is observed to: non-immunoglobulin hamster serum proteins. Background: Rabbit anti-hamster IgG (H&L) is a secondary antibody conjugated to ALP, which binds to hamster IgG (H&L) in immunological assays. Antibody is affinity purified using solid phase hamster IgG (H&L).</p>
