Product Datasheet

ASH1 - Histone-lysine N-methyltransferase ASH1 GRP12973

Species/Host Rabbit

Reactivity Drosophila

Predicted Reactivity Drosophila melanogaster

Tested Applications ChIP, IL

Immunogen N-terminal GST-fusion of the peptide containing amino acids

1756-1855 of the Drosophila melanogaster Ash1protein, UniProt:

Q9VW15

Form/Appearance Lyophilized

Storage Store lyophilized/reconstituted at -20°C; once reconstituted make

aliquots to avoid repeated freeze-thaw cycles. Please, remember to spin tubes briefly prior to opening them to avoid any losses that might occur from lyophilized material adhering to the cap or

sides of the tubes.

Note For research use only.

Clonality Polyclonal

Purity Affinity purified serum in PBS, pH 7.4

MW 236 / 300 kDa

Uniprot ID Q9VW15

Dilution Range 1 : 500 (IL), 10ng/ul (ChIP)

Application Notes Background: Histone-lysine N-methyltransferase ash1 is a Trithorax group (TrxG)

protein that has histone methyltransferase activity. Specifically trimethylates 'Lys-4' of histone H3, a specific tag for epigenetic transcriptional activation.

Reconstitution: For reconstitution add 50 µl of sterile water.
