Product Datasheet

Llama anti-Mouse IgG (H&L), HRP Conjugated **GRP12983**

Species/Host Llama

Reactivity Mouse

Purified mouse IgG, whole molecule **Immunogen**

Form/Appearance Lyophilized

Store lyophilized material at 2-8°C. For long time storage after Storage

reconstitution, dilute the antibody solution with glycerol to a final concentration of 50% glycerol and store as liquid at -20°C, to prevent loss of enzymatic activity. For example, if you have reconstituted 1 mg of antibody in 1.1 ml of sterile water add 1.1 ml of glycerol. Such solution will not freeze in -20°C. If you are using a 1:5000 dilution prior to diluting with glycerol, then you would need to use a 1:2500 dilution after adding glycerol. Prepare working dilution prior to use and then discard. Be sure to mix well

but without foaming.

Note For research use only.

Clonality Polyclonal

Affinity purified llama IgG Purity

Dilution Range The optimal working dilution should be determined by the

investigator.

Application Notes

Additional Information: 10 mM Sodium Phosphate, 0.15 M Sodium Chloride, pH 7.2, 1 % (w/v) BSA, Protease/IgG free, 0.1% (v/v) Kathon CGBased on IEP, this antibody reacts with: heavy (γ) chains chains on mouse IgG light chains on all on

all mouse immunoglobulins. Based on IEP, no reactivity is observed to:+

non-immunoglobulin mouse serum proteins Background: Llama anti-Mouse IgG (H&L), HRP Conjugated is a secondary antibody which binds to heavy (γ) chains chains on mouse IgG light chains on all mouse immunoglobulins Reconstitution: For reconstitution add 1.1 ml of sterile water. Let it stand 30 minutes at room

temperature to dissolve. Prepare fresh working dilutions daily.
