

## Product Datasheet

### Rabbit anti-Hamster IgG (H&L), HRP conjugated, min. cross reactivity to human serum proteins GRP13019

Species/Host	Rabbit
Reactivity	Hamster
Tested Applications	FC, IL
Immunogen	Purified Hamster IgG, whole molecule
Form/Appearance	Lyophilized
Storage	Store freeze-dried powder at 2-8 °C.
Note	For research use only.
Clonality	Polyclonal
Purity	Affinity purified
Dilution Range	1 : 20-1 : 2000 (Flow cyt), (IL)
Application Notes	<p>Additional Information: Antibody purity is &gt; 95% based on SDS-PAGE. Affinity purified using solid phase Hamster IgG. Antibody is supplied in 10 mM Sodium Phosphate, 0.15 M Sodium Chloride, pH 7.2, 1 % (w/v) BSA, Protease/IgG free. 0.1% (v/v) Kathon CG is added as a preservative. Based on IEP, this antibody reacts with: • heavy (γ) chains on hamster IgG • light chains on all hamster immunoglobulins. Based on IEP, no reactivity is observed to: • non-immunoglobulin hamster serum immunoglobulins • human serum proteins.</p> <p>Background: Rabbit anti-hamster IgG (H&amp;L), HRP conjugated, is a secondary antibody conjugated to HRP, which binds to Hamster IgG (H&amp;L) in immunological assays. Reconstitution: For reconstitution add 1.1 ml of sterile water. Let it stand 30 minutes at room temperature to dissolve. Prepare fresh working dilutions daily.</p>
