

Product Datasheet

Rabbit anti-Hamster IgG (H&L), HRP conjugated, min. cross reactivity to human serum proteins GRP13019

| | |
|---------------------|--------------------------------------|
| Species/Host | Rabbit |
| Reactivity | Hamster |
| Tested Applications | FC, IL |
| Immunogen | Purified Hamster IgG, whole molecule |
| Form/Appearance | Lyophilized |
| Storage | Store freeze-dried powder at 2-8 °C. |
| Note | For research use only. |
| Clonality | Polyclonal |
| Purity | Affinity purified |
| Dilution Range | 1 : 20-1 : 2000 (Flow cyt), (IL) |

Application Notes Additional Information: Antibody purity is > 95% based on SDS-PAGE. Affinity purified using solid phase Hamster IgG. Antibody is supplied in 10 mM Sodium Phosphate, 0.15 M Sodium Chloride, pH 7.2, 1 % (w/v) BSA, Protease/IgG free. 0.1% (v/v) Kathon CG is added as a preservative. Based on IEP, this antibody reacts with: • heavy (γ) chains on hamster IgG • light chains on all hamster immunoglobulins. Based on IEP, no reactivity is observed to: • non-immunoglobulin hamster serum immunoglobulins • human serum proteins. Background: Rabbit anti-hamster IgG (H&L), HRP conjugated, is a secondary antibody conjugated to HRP, which binds to Hamster IgG (H&L) in immunological assays. Reconstitution: For reconstitution add 1.1 ml of sterile water. Let it stand 30 minutes at room temperature to dissolve. Prepare fresh working dilutions daily.
