Product Datasheet

Cas9 - CRISPR-associated endonuclease 9 (polyclonal) GRP13162

Species/Host Rabbit

Tested Applications WB, IL

Immunogen KLH-conjugated synthetic peptide derived from Streptococcus

thermophilus Cas9/Csn1 protein sequence, UniProt: Q03JI6

Form/Appearance Lyophilized

Storage Store lyophilized/reconstituted at -20°C; once reconstituted make

aliquots to avoid repeated freeze-thaw cycles. Please, remember to spin tubes briefly prior to opening them to avoid any losses that might occur from lyophilized material adhering to the cap or

sides of the tubes.

Note For research use only.

Clonality Polyclonal

Purity Affinity purified serum in PBS, pH 7.4

MW Depends upon a MW of a protein which is a fusion partner.

Uniprot ID Q03JI6

Dilution Range 1 : 100 (IL), 1 : 1000 (WB)

Application Notes Background: Cas9 (CRISPR-associated endonuclease 9) is an RNA-guided DNA

endonuclease associated with the Clustered Regularly Interspaced Short Palindromic Repeats (CRISPR) type II adaptive immunity system. CRISPR clusters are transcribed and processed into CRISPR RNA (crRNA). Cas9 protein serves as a genome engineering tool to induce site-directed double strand breaks in DNA.

Reconstitution: For reconstitution add 50 μl of sterile water.
