Product Datasheet

Hirudin - Refludan GRP13224

Species/Host Chicken

Predicted Reactivity Hirudo medicinalis

Immunogen purified full length recombinant protein (Refludan®, Hoechst

Marion Roussel Inc.)

Form/Appearance Liquid in 0.9% NaCl, 0.1% sodium azide

Storage Store at 4°C; make aliquots to avoid working with a stock. Please,

remember to spin tubes briefly prior to opening them to avoid any losses that might occur from liquid material adhering to the

cap or sides of the tubes.

Note For research use only.

Clonality Polyclonal

Purity Total IgY fraction

MW 7 kDa

Dilution Range 1 : 1000 (ELISA), 1 : 1000 (WB)

Application Notes Additional Information: Reactiv against purified hirudine; no reactivity against

normal human plasma in ELISA. The IgY fraction is isolated by a two-step PEG precipitation. procedure followed by ammonium sulphate precipitation. Background: Hirudin (P01050) is a highly effective and very specific

anticoagulant which specifically inhibits formation of fibrin and activation of factors V, VIII and XIII, by forming irreversible, noncovalent 1:1 complexes with alpha-thrombin. Hirudin is a 65 amino acid polypeptide, 7 kDa protein, naturally

originating from the medical leech Hirudo medicinalis. It is a very potent thrombin inhibitor. Antibody binding to hirudin inhibits the interaction with

alpha-thrombin.
