

Product Datasheet

Enbrel - Etanercept GRP13228

Species/Host	Chicken
Reactivity	Human
Predicted Reactivity	Human
Immunogen	Purified, recombinant human Enbrel®
Form/Appearance	Liquid in 0.9% NaCl, 0.1% sodium azide
Storage	Store at 4°C; make aliquots to avoid working with a stock. Please, remember to spin tubes briefly prior to opening them to avoid any losses that might occur from liquid material adhering to the cap or sides of the tubes.
Note	For research use only.
Clonality	Polyclonal
Purity	Total IgY
MW	150 kDa (Enbrel)
Dilution Range	1 : 5 000 (ELISA), 1 : 5 000 (WB)
Application Notes	Additional Information: The antibody has no reactivity against TNF alfa. Up to date no tests have been done against TNFR1. Total IgY concentration for this antibody is 20 mg/ml The antibody has been used as a detecting antibody in ELISA against Enbrel attached to the surface. It gave a good signal and suggested dilution for this experiment is 1: 1000 – 1 : 5000. Background: Etanercept (Enbrel®), is a recombinant human tumor necrosis factor receptor (TNFRSF1B). Enbrel® consist of the extracellular ligand-binding portion of TNFRSF1B linked to an immunoglobulin Fc chain. It binds to TNF-alpha and blocks its interactions with receptors.
