Anti-Hu CD352 Purified GRP13269

Description CD352, also known as SLAMF6 (SLAM family member 6) is a type I

transmembrane glycoprotein expressed on NK cells, T cells, and B cells, and serves as a coreceptor for them. Besides association of its tyrosine phosphorylated intracellular domain with SH2D1A

protein, it associates also with SH2 domain-containing

phosphatases, which can modulate the signaling. Multiple CD352

isoforms have been identified.
