Product Datasheet

Anti-Granzyme B FITC GRP13258

Description

Granzyme B is a serine protease that is expressed in cytoplasmic granules of cytotoxic T lymphocytes and NK cells. Vectorial secretion of perforin and granzymes is responsible for their granule-mediated cytotoxicity. Granzyme B plays a pivotal role in the induction of apoptosis in the target cells by activation of caspases. Moreover, granzyme B was reported to cleave directly alpha-tubulin, leading to perturbation of microtubule networks

during the induced cell death.

Reactivity Human, Primate

FC **Tested Applications**

Human NK cell line YT-INDY-derived granzyme B **Immunogen**

FITC Form/Appearance

Preservatives Stabilizing phosphate buffered saline (PBS) solution containing 15

mM sodium azide

Store in the dark at 2-8°C. Do not freeze. Avoid prolonged Storage

exposure to light. Do not use after expiration date stamped on

vial label.

For research use only. Note

Mouse IgG1 Isotype

Clone ID CLB-GB11

Uniprot ID P10144

NCBI 3002
