

## Product Datasheet

### Anti-Hu CD93 FITC GRP13261

<b>Description</b>	CD93 (also known as C1qR1) is a type I transmembrane glycoprotein containing extracellular N-terminal C-type lectin domain and five EGF-like domains, and an intracellular tail interacting with moesin, a protein known to play a role in linking transmembrane proteins to the cytoskeleton and in the remodelling of the cytoskeleton. CD93 was reported to serve as a receptor for complement component C1q, but this function has not been fully elucidated yet. CD93 is involved in intercellular adhesion and in the clearance of apoptotic cells.
<b>Reactivity</b>	Human
<b>Tested Applications</b>	FC
<b>Immunogen</b>	KG1 cell line
<b>Form/Appearance</b>	FITC
<b>Preservatives</b>	Stabilizing phosphate buffered saline (PBS) solution containing 15 mM sodium azide
<b>Storage</b>	Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light. Do not use after expiration date stamped on vial label.
<b>Note</b>	For research use only.
<b>Isotype</b>	Mouse IgG1
<b>Clone ID</b>	VIMD2
<b>Uniprot ID</b>	Q9NPY3
<b>NCBI</b>	22918
