AIF Polyclonal Antibody GRP189

Description	Functions both as NADH oxidoreductase and as regulator of apoptosis. In response to apoptotic stimuli, it is released from the mitochondrion intermembrane space into the cytosol and to the nucleus, where it functions as a proapoptotic factor in a caspase-independent pathway. In contrast, functions as an antiapoptotic factor in normal mitochondria via its NADH oxidoreductase activity. The soluble form (AIFsol) found in the nucleus induces 'parthanatos' i.e. caspase-independent fragmentation of chromosomal DNA. Interacts with EIF3G, and thereby inhibits the EIF3 machinery and protein synthesis, and activates casapse-7 to amplify apoptosis. Plays a critical role in caspase-independent, pyknotic cell death in hydrogen peroxide-exposed cells. Binds to DNA in a sequence-independent manner.	
Species/Host	Rabbit	「ない」
Reactivity	Human, Mouse, Rat, Pig	
Conjugation	Unconjugated	
Tested Applications	IHC-P, WB	· · ·
Immunogen	KLH conjugated synthetic peptide derived from human AIF (public_immunogen_range: 130-180/613)	
Form/Appearance	Aqueous buffered solution containing 1% BSA, 50% glycerol and 0.09% sodium azide.	1404 0 000
Concentration	1ug/ul	21
Storage	Store at -20°C for 12 months.	Н
Note	For research use only.	
Isotype	IgG	
Clonality	Polyclonal	
Purity	Purified by Protein A.	
Uniprot ID	095831	
Entrez	9131	
Dilution Range	WB: 1:300-1000, IHC-P: 1:200-400
