Product Datasheet

CDK4 Polyclonal Antibody GRP278

Description Ser/Thr-kinase component of cyclin D-CDK4 (DC) complexes that

phosphorylate and inhibit members of the retinoblastoma (RB) protein family including RB1 and regulate the cell-cycle during G(1)/S transition. Phosphorylation of RB1 allows dissociation of the transcription factor E2F from the RB/E2F complexes and the subsequent transcription of E2F target genes which are

responsible for the progression through the G(1) phase. Hypophosphorylates RB1 in early G(1) phase. Cyclin D-CDK4 complexes are major integrators of various mitogenenic and antimitogenic signals. Also phosphorylates SMAD3 in a

cell-cycle-dependent manner and represses its transcriptional activity. Component of the ternary complex, cyclin

D/CDK4/CDKN1B, required for nuclear translocation and activity of the cyclin D-CDK4 complex.

Species/Host Rabbit

Reactivity Human, Mouse, Rat

Conjugation Unconjugated

Tested Applications IHC-P, WB

Immunogen KLH conjugated synthetic peptide derived from human CDK4

(public_immunogen_range: 250-303/303)

Aqueous buffered solution containing 1% BSA, 50% glycerol and Form/Appearance

0.09% sodium azide.

Concentration 1ug/ul

Store at -20°C for 12 months. Storage

For research use only. Note

Isotype IgG

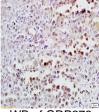

Clonality Polyclonal

Purity Purified by Protein A.

P11802 **Uniprot ID**

Entrez 1019

WB: 1:300-1000, IHC-P: 1:200-400 **Dilution Range**

WB of GRP278

IHC-P of GRP278
