

## **Product Datasheet**

## **AQP3 Polyclonal Antibody GRP372**

Description	Water channel required to promote glycerol permeability and water transport across cell membranes. Acts as a glycerol transporter in skin and plays an important role in regulating SC (stratum corneum) and epidermal glycerol content. Involved in skin hydration, wound healing, and tumorigenesis. Provides kidney medullary collecting duct with high permeability to water, thereby permitting water to move in the direction of an osmotic gradient. Slightly permeable to urea and may function as a water and urea exit mechanism in antidiuresis in collecting duct cells. It may play an important role in gastrointestinal tract water transport and in glycerol metabolism.	
Species/Host	Rabbit	Unit A Harden
Reactivity	Human, Mouse, Rat	75 — 63 — 48 — 35 — — Caloo
Conjugation	Unconjugated	25 <u></u> 20 <u></u>
Tested Applications	IHC-P, WB	WB of GRP3
Immunogen	KLH conjugated synthetic peptide derived from mouse AQP3 (public_immunogen_range: 266-292/292)	
Form/Appearance	Aqueous buffered solution containing 1% BSA, 50% glycerol and 0.09% sodium azide.	· · · ·
Concentration	lug/ul	and the second
Storage	Store at -20°C for 12 months.	IHC-P of GRF
Note	For research use only.	
Isotype	lgG	
Clonality	Polyclonal	
Purity	Purified by Protein A.	
Uniprot ID	Q8R2N1	
Entrez	11828	
Dilution Range	WB: 1:300-1000, IHC-P: 1:200-400
