Product Datasheet

LOXL2 antibody GRP36

Description This gene encodes a member of the lysyl oxidase gene family.

The prototypic member of the family is essential to the biogenesis of connective tissue, encoding an extracellular copper-dependent amine oxidase that catalyses the first step in the formation of crosslinks in collagens and elastin. A highly conserved amino acid sequence at the C-terminus end appears to be sufficient for amine oxidase activity, suggesting that each family member may retain this function. The N-terminus is poorly conserved and may impart additional roles in developmental regulation, senescence, tumor suppression, cell growth control, and chemotaxis to each

member of the family. [provided by RefSeq]

Species/Host Rabbit

Reactivity Human, Mouse

Conjugation Unconjugated

Tested Applications ICC, IF, IHC-Fr, IHC-P, WB

Immunogen Recombinant protein encompassing a sequence within the cente

region of human LOXL2. The exact sequence is proprietary.

Form/Appearance Liquid: 1XPBS, 1% BSA, 20% Glycerol (pH7). 0.025% ProClin 300

was added as a preservative.

Concentration 0.17 mg/ml

Storage Store as concentrated solution. Centrifuge briefly prior to opening

vial. For short-term storage (1-2 weeks), store at 4°C. For long-term storage, aliquot and store at -20°C or below. Avoid

multiple freeze-thaw cycles.

Note For research use only.

Isotype IgG

Clonality Polyclonal

Purity Purified by antigen-affinity chromatography.

Uniprot ID Q9Y4K0

Entrez 4017

Dilution Range WB: 1:500-1:10000,ICC: 1:100-1:1000,IHC-P: 1:100-1:1000

LOXL2 antibody detects LOXL2 protein at cytoplasm and nucleus by immunofluorescent analysis.Sample: A431 cells were fixed in ice-cold

were fixed in ice-cold MeOH for 5 min.Green: LOXL2

protein stained by LOXL2 antibody

(GRP488) diluted at 1:500..Blue: Hoechst 33342 staining.Sca

Non-transfected (â€") and transfected (+) 293T whole cell extracts (30 ?g) were separated by 7.5% SDS-PAGE, and the membrane was blotted with LOXL2 antibody (GRP488) diluted at 1:5000.
