Apolipoprotein J Polyclonal Antibody GRP387

Description	Isoform 1 functions as extracellular chaperone that prevents aggregation of nonnative proteins. Prevents stress-induced aggregation of blood plasma proteins. Inhibits formation of amyloid fibrils by APP, APOC2, B2M, CALCA, CSN3, SNCA and aggregation-prone LYZ variants (in vitro). Does not require ATP. Maintains partially unfolded proteins in a state appropriate for subsequent refolding by other chaperones, such as HSPA8/HSC7. Does not refold proteins by itself. Binding to cell surface receptors triggers internalization of the chaperone-client complex and subsequent lysosomal or proteasomal degradation. Secreted isoform 1 protects cells against apoptosis and against cytolysis by complement. Intracellular isoforms interact with ubiquitin and SCF (SKP1-CUL1-F-box protein) E3 ubiquitin-protein ligase complexes and promote the ubiquitination and subsequent proteasomal degradation of target proteins. Promotes proteasomal degradation of cOMMD1 and IKBKB. Modulates NF-kappa-B transcriptional activity. Nuclear isoforms promote apoptosis. Mitochondrial isoforms suppress BAX-dependent release of cytochrome c into the cytoplasm and inhibit apoptosis. Plays a role in the regulation of cell proliferation.	
Species/Host	Rabbit	week?
Reactivity	Human, Mouse, Rat	75 — · 48 — Caspase-1 P10 35 —
Conjugation	Unconjugated	25 <u></u> 20 <u></u> 17 <u></u>
Tested Applications	IHC-P, WB	11— ·
Immunogen	KLH conjugated synthetic peptide derived from human Apolipoprotein J (public_immunogen_range: 433-442/449)	WB of GRP387
Form/Appearance	Aqueous buffered solution containing 1% BSA, 50% glycerol and 0.09% sodium azide.	
Concentration	1ug/ul	A. S.
Storage	Store at -20°C for 12 months.	IHC-P of GRP387
Note	For research use only.	
Isotype	IgG	
Clonality	Polyclonal	
Purity	Purified by Protein A.	
Uniprot ID	P10909	
Entrez	1191	
Dilution Range	WB: 1:300-1000, IHC-P: 1:200-400
