

Product Datasheet

BOVINE IgG (H&L) (GOAT) Antibody GRP2783

Description	Anti-BOVINE IgG (H&L) (GOAT) Antibody
Species/Host	Goat
Reactivity	Bovine
Conjugation	Unconjugated
Tested Applications	ELISA, IHC-P, WB
Form/Appearance	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Concentration	10.0 mg/mL
Note	For research use only.
Isotype	IgG
Clonality	Polyclonal
Source	Bovine IgG whole molecule
Entrez	1192
Dilution Range	ELISA: 1:20,000 - 1:100,000, Immunochemistry: 1:1,000 - 1:5,000, Western Blot: 1:2,000 - 1:10,000

Application Notes Anti-Bovine IgG Secondary Antibodies are designed for Western Blotting, ELISA and Immunohistochemistry. Secondary antibodies can also be used for a variety of other applications such as Assay Development, Flow Cytometry and in situ hybridization.
