Fumarate hydratase antibody **GRP43**

Description	The protein encoded by this gene is an enzymatic component of the tricarboxylic acid (TCA) cycle, or Krebs cycle, and catalyzes the formation of L-malate from fumarate. It exists in both a cytosolic form and an N-terminal extended form, differing only in the translation start site used. The N-terminal extended form is targeted to the mitochondrion, where the removal of the extension generates the same form as in the cytoplasm. It is similar to some thermostable class II fumarases and functions as a homotetramer. Mutations in this gene can cause fumarase deficiency and lead to progressive encephalopathy. [provided by RefSeq]	
Species/Host	Rabbit	
Reactivity	Human, Mouse, Rat	and the second
Conjugation	Unconjugated	Sales and a second
Tested Applications	ICC, IF, IHC-P, WB	S De COn
		Immunohistochemical analysis
Immunogen	Recombinant protein encompassing a sequence within the cente region of human Fumarate hydratase. The exact sequence is	of paraffin-embedded NCIN87
	proprietary.	xenograft, using fumarate hydratase (GRP495)
Form/Appearance	Liquid: 1XPBS, 20% Glycerol (pH7). 0.025% ProClin 300 was added as a preservative.	antibody at 1:500 dilution.
Concentration	1.61 mg/ml	<u>кра</u> 130 — А 95 —
Storage	Store as concentrated solution. Centrifuge briefly prior to openin vial. For short-term storage (1-2 weeks), store at 4°C. For	72 — 55 —
	long-term storage, aliquot and store at -20°C or below. Avoid multiple freeze-thaw cycles.	43 — 34 —
Note	For research use only.	26 — Fumarate hydratase
Isotype	lgG	antibody detects FH protein by
Clonality	Polyclonal	western blot analysis. A. 50 ?g mouse liver lysate/extract
Purity	Purified by antigen-affinity chromatography.	7.5% SDS-PAGE Fumarate
Uniprot ID	P07954	hydratase antibody (GRP495)
Entrez	2271	dilution: 1:1000 The HRP-conjugated anti-rabbit
Dilution Range	WB: 1:500-1:3000,ICC: 1:100-1:1000,IHC-P: 1:100-1:1000	IgG antibody was used to detect the prim
