## **Product Datasheet**

## Vitamin D Receptor/VDR Antibody **GRP497**

Description Nuclear hormone receptor. Transcription factor that mediates the

action of vitamin D3 by controlling the expression of hormone sensitive genes. Regulates transcription of hormone sensitive genes via its association with the WINAC complex, a

chromatin-remodeling complex. Recruited to promoters via its interaction with the WINAC complex subunit BAZ1B/WSTF, which mediates the interaction with acetylated histones, an essential step for VDR-promoter association. Plays a central role in calcium

homeostasis.

Species/Host Rabbit

Reactivity Human, Mouse, Rat

Conjugation Unconjugated

**Tested Applications** IHC-P, WB

KLH conjugated synthetic peptide derived from human Vitamin E Immunogen

Receptor

Form/Appearance Agueous buffered solution containing 1% BSA, 50% glycerol and

0.09% sodium azide.

Concentration 1ug/ul

Store at -20°C for 12 months. Storage

Note For research use only.

Isotype IgG

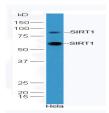

Clonality Polyclonal

**Purity** Purified by Protein A.

**Uniprot ID** P11473

**Entrez** 7421

**Dilution Range** WB: 1:300-1000, IHC-P: 1:200-400

WB of GRP497

IHC-P of GRP497
