### FERRITIN (Human Spleen) (RABBIT) Antibody Peroxidase Conjugated GRP2425

|                     |                                                                                                                      |
|---------------------|----------------------------------------------------------------------------------------------------------------------|
| Description         | Anti-FERRITIN (Human Spleen) (RABBIT) Antibody Peroxidase Conjugated                                                 |
| Species/Host        | Rabbit                                                                                                               |
| Reactivity          | Human                                                                                                                |
| Conjugation         | HRP                                                                                                                  |
| Tested Applications | ELISA, IF, IHC-P, WB                                                                                                 |
| Form/Appearance     | 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2                                                           |
| Concentration       | 1.0 mg/mL                                                                                                            |
| Note                | For research use only.                                                                                               |
| Isotype             | IgG                                                                                                                  |
| Clonality           | Polyclonal                                                                                                           |
| Source              | Ferritin [Human Spleen]                                                                                              |
| Uniprot ID          | <b>P02794</b>                                                                                                        |
