### GOAT IgG (H&L) (RABBIT) Antibody ATTO 647N Conjugated (Min X Hu, Ms, Rb Serum Proteins) GRP4319

|                            |                                                                                              |
|----------------------------|----------------------------------------------------------------------------------------------|
| <b>Description</b>         | Anti-GOAT IgG (H&L) (RABBIT) Antibody ATTO 647N Conjugated (Min X Hu, Ms, Rb Serum Proteins) |
| <b>Species/Host</b>        | Rabbit                                                                                       |
| <b>Conjugation</b>         | ATTO-647N                                                                                    |
| <b>Tested Applications</b> | IF, IHC-P, WB                                                                                |
| <b>Form/Appearance</b>     | 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2                                   |
| <b>Concentration</b>       | 1.0 mg/mL                                                                                    |
| <b>Note</b>                | For research use only.                                                                       |
| <b>Isotype</b>             | IgG                                                                                          |
| <b>Clonality</b>           | Polyclonal                                                                                   |
| <b>Source</b>              | Goat IgG whole molecule                                                                      |
| <b>Entrez</b>              | <b>142</b>                                                                                   |
| <b>Dilution Range</b>      | FLISA: >1:20,000, Fluorochrome: 2.5, IF Microscopy: >1:5,000, Western Blot: >1:10,000        |
