### GOAT IgG (H&L) (RABBIT) Antibody Peroxidase Conjugated (Min X Human Serum Proteins) GRP4301

|                        |                                                                                          |
|------------------------|------------------------------------------------------------------------------------------|
| <b>Description</b>     | Anti-GOAT IgG (H&L) (RABBIT) Antibody Peroxidase Conjugated (Min X Human Serum Proteins) |
| <b>Species/Host</b>    | Rabbit                                                                                   |
| <b>Reactivity</b>      | Goat                                                                                     |
| <b>Conjugation</b>     | HRP                                                                                      |
| <b>Form/Appearance</b> | 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2                               |
| <b>Note</b>            | For research use only.                                                                   |
| <b>Isotype</b>         | IgG                                                                                      |
| <b>Clonality</b>       | Polyclonal                                                                               |
| <b>Source</b>          | Goat IgG whole molecule                                                                  |
| <b>Entrez</b>          | <b>27250</b>                                                                             |

**Application Notes** Suitable for immunoblotting (western or dot blot), ELISA, immunoperoxidase electron microscopy and immunohistochemistry as well as other peroxidase-antibody based enzymatic assays requiring lot-to-lot consistency.
