

Product Datasheet

CD36 Polyclonal Antibody GRP591

Description	Binds to collagen, thrombospondin, anionic phospholipids and oxidized low-density lipoprotein (oxLDL). May function as a cell adhesion molecule. Directly mediates cytoadherence of Plasmodium falciparum parasitized erythrocytes. Binds long chain fatty acids and may function in the transport and/or as a regulator of fatty acid transport. Receptor for thombospondins, THBS1 AND THBS2, mediating their antiangiogenic effects. As a coreceptor for TLR4-TLR6 heterodimer, promotes inflammation in monocytes/macrophages. Upon ligand binding, such as oxLDL or amyloid-beta 42, rapidly induces the formation of a heterodimer of TLR4 and TLR6, which is internalized and triggers inflammatory response, leading to NF-kappa-B-dependent production of CXCL1, CXCL2 and CCL9 cytokines, via MYD88 signaling pathway, and CCL5 cytokine, via TICAM1 signaling pathway, as well as IL1B secretion.	
Species/Host	Rabbit	¢
Reactivity	Human, Mouse, Rat	75 — 63 — GLP-1R
Conjugation	Unconjugated	48 — GLF-IK 35 —
Tested Applications	IHC-P, WB	25—
Immunogen	KLH conjugated synthetic peptide derived from human CD36	WB of GRP591
mmunogen	(public_immunogen_range: 360-400/472)	and a star
Form/Appearance	Aqueous buffered solution containing 1% BSA, 50% glycerol and 0.09% sodium azide.	
Concentration	lug/ul	
Storage	Store at -20°C for 12 months.	IHC-P of GRP591
Note	For research use only.	
Isotype	lgG	
Clonality	Polyclonal	
Purity	Purified by Protein A.	
Uniprot ID	P16671	
Entrez	948	
Dilution Range	WB: 1:300-1000, IHC-P: 1:200-400
