## HSP70 (5G10) Monoclonal Antibody GRP627

| Description         | This intronless gene encodes a 70kDa heat shock protein which is<br>a member of the heat shock protein 70 family. In conjuction with<br>other heat shock proteins, this protein stabilizes existing proteins<br>against aggregation and mediates the folding of newly translated<br>proteins in the cytosol and in organelles. It is also involved in the<br>ubiquitin-proteasome pathway through interaction with the<br>AU-rich element RNA-binding protein 1. The gene is located in the<br>major histocompatibility complex class III region, in a cluster with<br>two closely related genes which encode similar proteins.<br>[provided by RefSeq, Jul 2008]. |  |
|---------------------|--|--|
| Species/Host        | Mouse  | - Artenneesse                                      |
| Reactivity          | Human, Mouse   | 135 —<br>100 —                                     |
| Conjugation         | Unconjugated   | 75 —<br>63 —<br>48 — Cytokeratin 18                |
| Tested Applications | IHC-P, WB  | <sup>35</sup> —<br><sup>25</sup> —<br>WB of GRP627 |
| Immunogen           | KLH conjugated synthetic peptide derived from human HSP70  |  |
| Form/Appearance     | Aqueous buffered solution containing 1% BSA, 50% glycerol and 0.09% sodium azide.  | 00000  |
| Concentration       | 1ug/ul   | 0.002  |
| Storage             | Store at -20°C for 12 months.  | IHC-P of GRP627                                    |
| Note                | For research use only.   |  |
| Isotype             | lgG  |  |
| Clonality           | Monoclonal   |  |
| Purity              | Purified by Protein G.   |  |
| Clone ID            | 5G10   |  |
| Uniprot ID          | P0DMV9, P0DMV8   |  |
| Entrez              | 3303, 3304   |  |
| Dilution Range      | WB: 1:300-1000, IHC-P: 1:200-400   |  |
|                     |  |  |
