Product Datasheet

Huntington pS434 (RABBIT) Antibody GRP3922

Description Anti-Huntington pS434 (RABBIT) Antibody

Species/Host Rabbit

Reactivity Human, Mouse, Rat

Conjugation Unconjugated

Tested Applications ELISA, IHC-P, WB

Form/Appearance 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2

Concentration 1.07 mg/mL

Note For research use only.

Isotype IgG

Clonality Polyclonal

Source Anti-Huntingtin pS434 affinity purified antibody was prepared

from whole rabbit serum produced by repeated immunizations with a synthetic peptide corresponding to the internal region of

human Huntington disease protein.

Uniprot ID P42858

Dilution Range ELISA: 1: 10,000,Immunochemistry: user optimized,Western Blot:

1ug/ml

Application Notes Anti-HTT antibody is useful for ELISA, Immunohistochemistry, and Western Blot.

Specific conditions for reactivity should be optimized by the end user. Expect a band approximately $\sim 350 \text{kDa}$ corresponding to the appropriate cell lysate or

extract.
