

## Product Datasheet

### Goat anti-Chlamydia trachomatis, EBs, Polyclonal Antibody, Unconjugated GRP846

|                             |                                                                       |
|-----------------------------|-----------------------------------------------------------------------|
| <b>Species/Host</b>         | Goat                                                                  |
| <b>Predicted Reactivity</b> | Cross-reacts with Chlamydia psittacii & Chlamydia pneumoniae (TWAR)   |
| <b>Conjugation</b>          | Unconjugated                                                          |
| <b>Tested Applications</b>  | IF                                                                    |
| <b>Immunogen</b>            | L2 + other serovar groups                                             |
| <b>Note</b>                 | For research use only.                                                |
| <b>Isotype</b>              | IgG                                                                   |
| <b>Clonality</b>            | Polyclonal                                                            |
| <b>Dilution Range</b>       | >1:1,000 by indirect immunofluorescence vs. all serovars (A-K, L1-L3) |
