## **Product Datasheet**

## ATR antibody [2B5] GRP84

**Description** Ataxia Telangiectasia Mutated (ATM) and Rad3-related (ATR)

protein is a member of the phosphatidyl-inositol 3-kinase (PI 3-kinase) like family of protein kinases. ATR has a predicted molecular mass of approximately 301 kDa, and it has been shown to be involved in cellular responses to DNA damage. Specifically, it plays a role in checkpoint activation in response to either the presence of stalled replication forks, or by the presence of lesions caused by UV light. Inactivation of ATR is an embryonic lethal

event in mice.

Species/Host Mouse

Reactivity Human, Mouse

Conjugation Unconjugated

Tested Applications FA, ICC, IF, IP, WB

Immunogen Recombinant fragment, corresponding to amino acids 710-1100

of Human ATR.

Form/Appearance Liquid: PBS

Concentration 1 mg/ml

Storage Store as concentrated solution. Centrifuge briefly prior to opening vial. For short-term storage (1-2 weeks), store at 4°C. For

vial. For short-term storage (1-2 weeks), store at 4°C. For long-term storage, aliquot and store at -20°C or below. Avoid

multiple freeze-thaw cycles.

**Note** For research use only.

Isotype IgG1

**Clonality** Monoclonal

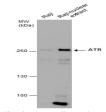

**Purity** Protein G purified

Clone ID 2B5

Uniprot ID Q13535

Entrez 545

**Dilution Range** WB: 1:500-1:3000

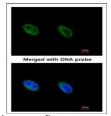

Raji whole cell and nuclear extracts (30 ?g) were separated by 5% SDS-PAGE, and the membrane was blotted

with

ATR antibody (GRP536) diluted at 1:500. The HRP-conjugated anti-mouse IgG antibody

was used to detect the primary antibody.

Immunofluorescence analysis of HeLa, using ATR(GRP536) antibody at 1:100 dilution.
