ATR antibody [2B5] GRP84

Description	Ataxia Telangiectasia Mutated (ATM) and Rad3-related (ATR) protein is a member of the phosphatidyl-inositol 3-kinase (Pl 3-kinase) like family of protein kinases. ATR has a predicted molecular mass of approximately 301 kDa, and it has been shown to be involved in cellular responses to DNA damage. Specifically, it plays a role in checkpoint activation in response to either the presence of stalled replication forks, or by the presence of lesions caused by UV light. Inactivation of ATR is an embryonic lethal event in mice.	
Species/Host	Mouse	NWV (CD9)
Reactivity	Human, Mouse	(KDa) 250 — ▲ ATR
Conjugation	Unconjugated	130 —
Tested Applications	FA, ICC, IF, IP, WB	100 - Contract
Immunogen	Recombinant fragment, corresponding to amino acids 710-1100 of Human ATR.	Raji whole cell and nuclear extracts (30 ?g) were separated by 5% SDS-PAGE, and the membrane was blotted
Form/Appearance	Liquid: PBS	with ATR antibody (GRP536)
Concentration	1 mg/ml	diluted at 1:500. The
Storage	Store as concentrated solution. Centrifuge briefly prior to openin- vial. For short-term storage (1-2 weeks), store at 4°C. For long-term storage, aliquot and store at -20°C or below. Avoid multiple freeze-thaw cycles.	HRP-conjugated anti-mouse IgG antibody was used to detect the primary antibody.
Note	For research use only.	
Isotype	lgG1	
Clonality	Monoclonal	Merged with DNA probe
Purity	Protein G purified	200
Clone ID	2B5	Immunofluorescence analysis of HeLa, using
Uniprot ID	Q13535	ATR(GRP536) antibody at 1:100 dilution.
Entrez	545	÷
Dilution Range	WB: 1:500-1:3000
