

Product Datasheet

Rabbit anti-Fluorescein affinity purified, HRP Conjugated GRP986

Species/Host	Rabbit
Predicted Reactivity	No cross reactivity with immunoglobulin of any species
Conjugation	HRP
Immunogen	solid phase hapten-antibody capture
Storage	2-8°C
Note	For research use only.
Isotype	IgG
Clonality	Polyclonal
Purity	Affinity purified

Application Notes This product consists of affinity purified & absorbed antibody covalently coupled to a highly purified preparation of Horseradish Peroxidase (RZ>3) by methods developed by The manufacturer. Care is taken to ensure adequate conjugation while preserving maximum enzyme activity. Free Enzyme is removed. Typical antibody concentration in this product is 1-2 mg/ml. Estimated HRP:IgG substitution is >1.5. This preparation is supplied in a Phosphate Saline Buffer stabilized with Bovine Serum Albumin (10 mg/ml) and preserved with 0.02% thimerosal. This product is suitable for immunoblotting, immunohistochemical and enzyme immunoassay applications. Working strength must be determined by the user but a starting range of 1:20 - 1:200 is recommended for immunochemistry and immunoblotting while 1 :200 - 1:1,000 is recommended for enzyme immunoassays. Recommended short term (
